## Payment Policy

1. The Company is financially responsible for the Client's account balance at any moment.
2. The Company's financial responsibility starts with the first record about the Client's deposit and continues up to the full withdrawal of the funds.
3. The Client has the right to demand from the Company any amount of funds which is available in their account at the time of the inquiry.
4. The only official deposit/withdrawal methods are the methods that appear on the Company's official Website. The Client is taking all the risks related to the use of the payment methods unless these payment methods are provided by the Company's partners or are the Company's responsibility. The Company isn't responsible for any delay or cancellation of financial transactions that may be caused by the selected payment system. In case where the Client has any claims related to any of the payment systems, it's their responsibility to contact the support service of the payment system and to notify the Company of their claims.
5. The Company shall not be responsible for the activities of any third-party service providers that the Client may use in order to make any deposit/withdrawal. The Company's financial responsibility for the Client's funds starts when the funds arrive to the Company's bank account or any other account related to the Company and this fact appears on the Payment Methods page of the Website. In case any fraud appears during the financial transaction or after it, the Company reserves the right to cancel the transaction and to freeze the Client's account.  
The Company's responsibility as to the Client's funds ends when the funds leave the Company's wallet or any other account related to the Company and this fact appears on the Payment Methods page of the Website.

6. In case of any technical errors that may appear when processing the financial transaction, the Company reserves the right to cancel that transaction and all other Client's financial activity on the Company's Website.

## Client's Registration

Client's registration procedure is based on two main steps:

1. Client's web registration.
2. Client's identity verification.

To complete the first step, the Client must: Provide the Company their real identity and contact details. Accept the Company's agreement and submit an application.

To complete the second step, the Client must: Provide a full copy of their ID card with a photo and personal details. The Company reserves the right to demand from the Client other documents, such as paying bills, bank confirmation, bank card scans or any other document that may be necessary during the verification process.

The identification process shall be completed in 10 business days since the Company's request to identify the Client. In some cases, the Company may increase the identification process up to 30 working days.

## Depositing Procedure

To make a deposit, the Client shall make an inquiry from their personal profile. To complete the inquiry, the Client shall choose any of the payment methods from the list, fill in all the required details and proceed to the payment page.

To make a deposit, you can:

- 1) Transfer Aurum to your Pergins.com account by selecting the appropriate payment method.

- 2) Convert from your base currency to Aurum, using the payment methods available for your country, for example, Credit Card, Bank Transfer, Cash, among others.

When you make a deposit through any of these payment methods, you will be converting your base currency to Aurum to trade on the platform. Your profit, loss and balance sheet will be denominated in Aurum and, as a reference, will be converted into US dollars at the current exchange rate. Whenever you wish to request a withdrawal, you may do so only through Aurum, since [pergins.com](http://pergins.com) only offers conversion on deposits and not withdrawals. You understand that it is your sole responsibility to subsequently convert from Aurum to your base currency using trading methods outside of [Pergins.com](http://Pergins.com).

The processing time of the inquiry depends on the selected payment method and may vary from one method to another. The Company cannot regulate the processing time. In case of using electronic payment methods, the transaction time can vary from seconds to days. In case of using direct bank wire, the transaction time can be up to 15 business days.
